Prof. Joshua Lederberg
Stanford University
Stanford, Calif.

Jan. 12, 1965.

Dear. Prof. Lederberg:

Enclosed please find the print-out of our experimental structure program which may interest you. The program, at present implemented on an IBM 1401 (8 k) has Waldo structures as input and gives a connection table, the Hiz cipher, and lists of rings and chains as output. Further conversions are being programmed. Your comments, suggestions, and questions will be appreciated.

I would be much obliged if you will kindly send me particulars about your DENDRAL system.

Yours sincerely,

K.D. Ofer

K.D. Ofer, Ph.D.
